- hassanhajbi0@gmail.com
- Paris, France
- El Hassan Hajbi

DOMAINS

- Computer Vision
- Advanced statistics and machine learning
- High Performance Computing
- Advanced Algorithms
- Cloud and observability
- Visual Representation & Multimodal AI

SOFT SKILLS

- Self-initiating
- Good communication skills (including scientific communication, and leadership)
- Strategic & Results-Driven
- Rigorous
- Versatile

LANGUAGES

- English ●●●●●
- French ●●●●●
- Chinese ●●●●●

INTERESTS

- Travelling
- Reading
- Photography
- Swimming (6 years in club)

El Hassan HAJBI

LEAD AI AND STRATEGY

Driving enterprise productivity through the fusion of technical architecture and business savvy. Proven at Schneider Electric for delivering multi-million-dollar efficiency gains via the IPP, I am an expert at navigating stakeholder complexity to deliver future-ready enterprise solutions.

WORK EXPERIENCES

- Schneider Electric** 2024 – PRESENT
Lead AI Engineer & Procurement Strategist
→ **Technical Productivity Pillar / Usecase**
 - Led development of a scalable 3D similarity search engine using self-built embedding models for rapid CAD part retrieval
 - Architected a Databricks/MLflow pipeline to process complex data at scale for agentic AI and material standardization→ **Leadership development / AI community**
 - Conducted AI technology watch to assess emerging tech maturity and communicated insights to technical and leadership audiences→ **Data strategy**
 - Defined technical productivity data needs and managed governance discussions with the PLM team for AI Hub deployment
 - Ensured compliant and structured handover of data strategy to the AI Hub governance team for enterprise-level scaling
- Schneider Electric** 2023 – 2024
Data scientist & ML engineer | Apprenticeship (1 year)
 - Deployed predictive win-rate models with 75% accuracy on 75K leads, significantly enhancing China sales team pipeline efficiency
 - Served as an AI consultant reporting to the VP of Procurement to lead high-impact use-case development and prioritization
- Schneider Electric** 2023
Data Scientist | Internship (4 months)
 - Leveraged forecasts and market insights to empower buyers during negotiations, enabling significant cost-saving opportunities
 - Optimized PA6 procurement for 45% of Final Distribution Spend (\$1B annual), driving million-dollar savings via category management

EDUCATION

- Grenoble Institute of Technology - Ensimag** 2021-2024
Computer engineering and applied mathematics Master Degree
- Lycee d'excellence (LYDEX) Benguerir - Maroc** 2019-2021
Preparatory courses

TECHNICAL STACK

Cloud: Azure, Databricks, AWS
AI/ML: LangChain, LlamaIndex, Hugging Face...
Agent Development: LangGraph, Dagster (Data orchestration), Langfuse / Langsmith (LLM monitoring/observability ...)
Machine Learning: statistics, machine learning and deep learning specialization and MLOps, Semantic similarity, Multimodal AI, Contrastive learning, LLM and VLM, 3D similarity, vector stores...
